

Roll Weight and Area Conversion Calculators

Quickly Calculate Your Order Volume

As a project manager or buyer, it's important to order the right volume of product. In the paper and film business it is common to talk about number of rolls or weight of rolls. This needs to be translated into feet or have feet translated into rolls or pounds of product.

Sierra Coating created these conversion tools to assist in these frequent calculations of film and paper to help you determine how much to buy or what you will receive in your order. And when you're ready to buy, we can help with that too.

Download these active spreadsheets for free, and for additional information, contact us today to find out more about our capabilities and pricing.
