

Food Grade Products

Eco Friendly Food Packaging & Poly Replacements

As more brands seek to adopt environmentally conscious practices, the demand for eco friendly packaging increases. Over the years, our team has orchestrated and contributed to a number of environmentally friendly packaging development projects, working with the nation's leading chemical companies to deliver eco friendly coating solutions.

Barrier Coating for Food Packaging

To ensure the safety, quality, and protect consumers' health, food packaging must be reliable and consumer friendly. For a paper-based food packaging product to be successful, it must be coated to perform additional functions. The most common functions of coatings are barrier or release.
