

Specialty Paper & Printing Substrates

Specialty Paper & Printing Substrates

Sierra® has produced specialty printing substrates for more than 20 years. Originally a coater of carbonless paper and inkjet papers, Sierra now manufactures products in 18 unique market segments.

Sierra applies coatings to create high-performance substrates. We engineer custom materials by coating and laminating a variety of films, papers, and synthetic materials while meeting your high-performance specifications.

We can help you develop coated substrates with functions such as:

- Abrasion resistant
- Adhesives
- Anti-microbial
- Anti-static
- Anti-skid/anti-slip
- Barrier

- Colors
- Chemical resistance
- Packaging cohesive materials
- Decoration
- Flame retardant
- Hard coats

- Heat seal
- Opaque/opacity
- Print receptive
- Silicone release
- Slip
- Paper or film tapes

Coatings include aqueous coatings, 100% solids, hot melt, solventless, waterborne, and color concentrates.

Let us help you with your paper coating needs today, [contact Sierra Coating](#) to learn more.
